FOREWORD

The information contained in this publication is accurate as of 1 January 1963. In using this document at a later time, periodic checks should be made with your local or state civil defense director to make certain that this information is still current. State and local civil defense directors are kept constantly apprised of new information and program changes through a coordinated series of publications known as the *Federal Guidance for State and Local Civil Defense.*

In checking with your civil defense director, citation of the Federal Guidance number (FG–F–1.2) on the cover will help him to be of prompt service to you.

In addition to State and local civil defense officials and the qualified architects and engineers listed herein, this directory is made available on request to individuals and companies desiring the services of an architect or engineer qualified in fallout shelter analysis.

Therefore, civil defense officials can anticipate requests for copies of this directory as well as inquiries concerning the currency of the listing contained herein, in accordance with the first two paragraphs.

Civil Defense Regional Offices and the States which they service are as follows:

PREFACE

This directory of Architects and Engineers is a listing of individuals who, as a minimum qualification, have successfully completed a two-week course in Fallout Shelter Analysis at an approved school under contract to the Office of Civil Defense, Department of Defense. All personnel who have qualified prior to January 1, 1963, are included in this directory.

The following Universities and Military Officer's Schools have conducted the intensive professional level Fallout Shelter Analysis Courses which included a comprehensive written examination:

Worcester Polytechnic Institute (WT)
University of Florida (UF)
University of Michigan (UM)
University of Illinois (UI)
University of Washington (UW)
University of Colorado (CO)
University of California (UC)
Oklahoma State University (OS)
George Washington University (GW)
U.S. Army Engineer School (FB)
U.S. Navy Civil Engineer Corps Officers School (PH)

Each architect and engineer who has successfully completed the course has been awarded a certificate of proficiency in Fallout Shelter Analysis bearing his serial number as shown in the directory.

This directory contains the names of individuals only and not the names of architectural or engineering firms. It should be noted that the omission of a firm name does not indicate that the firm is not qualified in Fallout Shelter Analysis. Many of the individuals listed in the directory are employed by or are consultants to architectural and engineering firms.

The listing of qualified architects and engineers for each of the eight Civil Defense Regions is arranged alphabetically. Each region is subdivided into the two following sections:

(1) registered professional architects and/or engineers
(2) non-registered architects and/or engineers.

Because they have satisfied the requirements of the Office of Civil Defense and appropriate State Boards of Architectural or Engineering Examiners, individuals listed in the "registered" sections of the directory are qualified to design as well as evaluate fallout shelters. Unless otherwise exempted by their State Boards, individuals who have received their certificates of proficiency in Fallout Shelter Analysis but are "not-registered", will have to perform their design and review of fallout shelters under the direct supervision of a duly registered architect or engineer.

CONTENTS

The national roster is divided into sections corresponding to the eight Civil Defense Regions. In addition to the regional listings two other sections are included. One section lists the qualified instructors from the nine universities and two military schools who are capable of teaching Fallout Shelter Analysis Courses and the other section includes those individuals residing in foreign countries who have become qualified.

Page numbers and sections corresponding to Civil Defense Regional Offices are as follows:
